Cut out cards along the dotted line...

 <p>Walrus</p>	 <p>Volcanoes</p>
 <p>Penguins</p>	 <p>Regularly experience an ozone hole</p>
 <p>Polar bears</p>	 <p>Icebergs</p>
 <p>Seals</p>	 <p>Whales</p>

Antarctica

Arctic	Antarctic	Arctic	Both
Walrus, with their long white tusks, live only in northern waters	Penguins live around the coasts of Antarctica and other southern continents and islands	Polar Bears live only in the Arctic	Seals live in both the Arctic and the Antarctic
Antarctic	Antarctic	Both	Both
Mt. Erebus in Antarctica is the world's southernmost active volcano	Every October since 1985, instruments have detected a reduction in the ozone concentration over Antarctica	Icebergs form in both polar regions—they are chunks of ice that originally formed from fresh water snow on land	Whales live in waters of both the Arctic and Antarctic

Antarctica

Cut out cards along the dotted line...

	Permanent home to zero humans		6 months of darkness
	Permanent home to over 3 million humans		6 months of daylight
	Ice breaker		Not Protected
	Cruise Ship		Protected

Antarctica

Antarctica	Arctic	Both	Both
There are no permanent residents in Antarctica, only temporary visitors	Cities inside the Arctic Circle have a total population over 3 million	Icebreakers are used in both polar regions to carve through sea ice.	Cruise ships regularly take passengers to see the beauty of both polar regions.
Both	Both	Arctic	Antarctic
The Arctic and the Antarctic both experience approximately 6 months of darkness in the winter	Both the Arctic and the Antarctic experience approximately 6 months of daylight in the summer	Except in specially set-aside areas, hunting, fishing, and mining are permitted in the Arctic	Hunting, fishing, and mining are prohibited in the Antarctic
